Create with Venetian Plaster

VENETIAN  
PLASTER

# Create an elegant polished stone or suede wall finish

**Venetian Plaster** is a finishing technique using thin layers of plaster applied with a spatula or trowel and then burnished to create a smooth surface with the illusion of depth and texture. “Venetian Plaster” is an American-made term to explain the variety of different techniques and materials used to create the polished stucco finish.

PERFECT FOR:

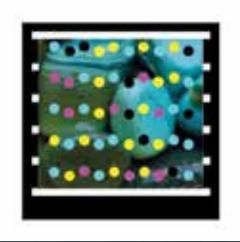

Residential • Hospitality • Restaurants • Casinos •  
Theatres • Corporate Offices

# The First Choice in Acrylic Venetian Plaster

Modern Masters was the first USA manufacturer of acrylic Venetian Plaster, which has been used by professional applicators and do-it-yourselfers on thousands of projects across North America. Our unique chemistry allows for an unlimited palette of colors utilizing any paint manufacturers' color system. Simply choose a color from your favorite paint dealer's fan deck and have it tinted right in the store. A collection of intense Pre-Mixed Master Palette colors are also available through your paint dealer. Create an elegant ambiance in residences, offices, restaurants and hotels. To find the dealer nearest you and to obtain product information go to: [modernmasters.com](http://modernmasters.com)

## Unlimited Color Options with Tint Bases

Venetian Plaster bases are untinted so the color options are limitless. Simply choose a color from your favorite paint dealer's fan deck and have it tinted right in the store. Because Venetian

Plaster is a polished plaster with translucency and depth, the color chosen will not match exactly, but the highs and lows will be in the same "family" of color.

## Ultra Deep Tint Base (VP200)

This tintable acrylic plaster can develop a beautiful, highly polished marble-like appearance. The more you polish, the more translucent the finish becomes. This translucency creates the depth seen in real marble, and

the beautiful finish is so smooth, it even feels like marble. Although it was originally intended for creating dark and ultra-deep colors, finishers prefer this base for light and mid-tone colors because of its translucency and ease of polishing. Available in quart, gallon and five gallon container sizes.

## Tint Base (VP100)

This tintable acrylic plaster base contains titanium dioxide which allows for creating light pastel to opaque mid-tone colors. Various looks can be created such as lightly polished marble, stone or suede. Available in quart, gallon and five gallon container sizes.

## Pre-Mixed Master Palette

These ultra-deep, hard to reach colors are pre-mixed and available in quart and gallon container sizes.

## Pre-Mixed Master Palette Colors

A collection of 15 ready-to-use ultra-deep hard to reach colors and popular earth tone hues. Available in quart and gallon container sizes.

## Protective Clear Topcoat (VP300)

This trowel applied clear protective sealer is intended for high traffic areas where washability is imperative or for rooms that experience high humidity. Available in quart and gallon container sizes.

## Pearl (VP303) and Gold (VP302) Topcoats

These trowel applied topcoats offer the same protection as the clear topcoat while adding a decorative, translucent pearl or gold shimmer to the Venetian Plaster finish. Available in quart container size.

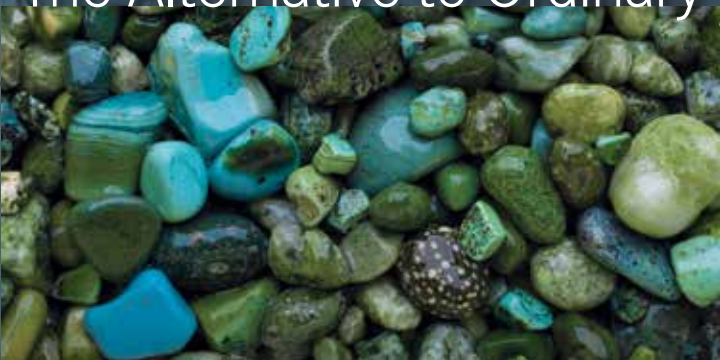

## Japanese Trowels

Produced in the same region as the famous Samurai swords, these trowels are made of 3 mm stainless steel which makes them extremely flexible and yet incredibly strong. Available in 240 mm and 270 mm sizes.
