To Whom It May Concern,

The OSHA Hazard Communication Standard, 29 CFR 1910.1200, which became effective 25 November 1985, and further revised on May 25, 2012 to align with UN Globally Harmonized System of Classification and Labelling of Chemicals (GHS), requires the manufacturers or importers of certain hazardous chemicals or products to assess their products as to their hazard potential. ShurTech Brands, LLC (ShurTech) has assessed the impact of the standard and concluded that ShurTech's FrogTape products are exempt from this standard. This exemption is based upon the premise that ShurTech's products are considered "ARTICLES" as defined in 29 CFR 1910.1200 (b) (6) (v). An "ARTICLE," as defined in 29 CFR 1910.1200 (c), "means a manufactured item, other than a fluid or particle:

- (i) *which is formed to a specific shape or design manufacture;*
- (ii) *which has end use function (s) dependent in whole or in part upon its shape or design during end use; and*
- (iii) *which under normal conditions of use does not release more than very small quantities, e.g. minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section) and does not pose a physical hazard or health risk to the employee."*

If you have any questions or would like any additional information, please do not hesitate to contact me at (440) 937-7000 or via email at [mmedvik@shurtech.com](mailto:mmedvik@shurtech.com).

Kind Regards,

Mike Medvik
