#### President's Page

Warner Tool Products have been the preferred and trusted choice of professional trade people and do-it-yourselfers since 1927. At Warner, we put the customer first. Our customers have learned to depend on products that carry the Warner brand. We've earned that trust by keeping our focus on the customer while adding value and innovation to our products.

The people at Warner are always focused on providing our customers with *Smarter* solutions, *Stronger* products, and *Better* service. This is *The Warner Way*.

We are continuously finding new and innovative solutions for our customers that will make their job easier and better. Our customers experience this through our continuous introduction of new products and the ongoing enhancements of our current product offerings. In 2002 we acquired Bull Dog Power Products, a line of lighting products and accessories, to further enhance our product offerings to our customers. With the addition of Bull Dog Power Products, we also changed our company's logo to better represent the total line of Warner products.

In 2004, we added a new line of Paint Pad products and accessories, including pads, rollers, edgers, replacement pads, refills and accessories for the professional and do-it-yourself painter. Most recently in 2007, we added an extensive line of Mini-Roller products and accessories that boast over 80 new SKUs. These tools complement our Paint Pad products while also providing a bridge for building onto our extensive line of hand tools for interior and exterior preparation and application products.

We believe our customers deserve the best. Therefore, we set our quality standards high and assure that every product we produce meets or exceeds those standards.

Our customers know that when they purchase a Warner product they are not just purchasing a stand-alone solution; they are purchasing a total commitment from an organization that is committed to providing its customers with a truly satisfying buying experience.

From our first company logo, "Warner Accuracy Tools," over 80 years ago to today's logo, "Warner Tool Products," Warner's commitment to providing outstanding value and service to the customer is unchanging.

Smarter. Stronger. Better. The Warner Way.™

## ProGrip Patented Color-Coding Handle Technology\*

The ProGrip2™ line uses a patented color-coded handle system to identify blade flexibility: Stiff, Flex, Full Flex. Matched color-coded icons on the labels demonstrate usage. This at-a-glance identification helps customers select the right tool for their needs and makes for easier, faster sales for you. The ProGrip2<sup>™</sup> line features:

- Ergonomic, color-coded soft grip handles
- Two handle-size options: Standard and XL (on select models)
- Seven blade-flexibility options
- High-quality carbon steel blades
- · Full tang
- Hammer Cap™ (on select models)
- Chisel-edge on stiff knives (except #90129)
- Large hang-hole size
- Made in U.S.A.

#### Red Handle = Stiff

Heavy-duty blades provide maximum strength and have a chisel-edge ground at a 16° angle. It is the optimum angle for fine scraping and shaving with less gouging or chipping. Standard blades are .050" thick and heavy-duty blades are .080" thick. Handles have a ribbed finger grip for better pushing control.

FOR SCRAPING AND REMOVAL

#### **Blue Handle = Flex**

Standard carbon steel blades are hollow-ground to provide consistent flex and proper stiffness for spreading heavy drywall compound. Ideal for first-coat applications. Ergonomic handles are designed to fit the hand more comfortably, for use as a spreading tool and to reduce fatigue. Some models available with an extralarge handle and Hammer Cap.<sup>TM</sup>

Use 11/4"-2" knives to apply spackle, putty and for detail work in smaller areas.

Use **3**" knives for patching, touch-up and heavy-duty scraping.

Use 4"-6" knives for taping drywall joints and large surface scraping.
Use a multi-purpose tool to scrape, clean and glaze.

#### Yellow Handle = Full Flex

Full Flex applies to blades that have been hollow-ground thinner for maximum flexibility. They are designed for lighter compounds and higher application rates. Perfect choice for final- or finish-coat applications.

Ergonomic handle is wider and flatter, designed to fit the hand for use as a spreading tool and to reduce fatigue. Design improves blade control.

#### Orange Handle = Flex Rated

Have you ever watched a contractor go through a rack of knives to test the blade flex? Professionals often test knife after knife looking for that special feel. That's why Warner introduced Flex Rated broad knives. It's an industry first with four standardized flexes, so the contractor can buy the same feel every time. Guaranteed.

Blades on these ProGrip2<sup>™</sup> tools are hollow-ground to be progressively more flexible, from #1 to #4. Blades are selected to meet the exact specifications of each flex level, so customers get the same flex every time.

Extra-large, ergonomic handles are wider and flatter. The larger handle size enhances both control and comfort. XL handle size also fits larger hands and reduces fatigue.

#### Warner Quality— Craftsmanship You Can Trust

If you're a professional who likes the feel of wood-handled tools but wants the performance of today's technology, the choice is Warner. The Rosewood Series offers the same high-quality blades as the ProGrip® Series, but with hardwood handles. Rosewood-colored handles are laminated and then pressure-treated with resin to be moisture-resistant. Won't swell or crack. Blades are made from .050," .060" and .080" thick carbon steel.

#### **Rosewood Series Features:**

- Blades are made of #1074 high carbon-grade steel
- Hollow-ground, heat-treated and annealed for toughness
- Blades polished and buffed to high luster finish for easier application and cleanup
- Full-tang design for maximum strength
- Brass rivets and eyelets mechanically lock handle to tang so it can't come loose
- · Chisel-edge on stiff knives

#### **ROSEWOOD SERIES - STIFF**

Heavy-duty blades provide maximum strength and have a chisel edge ground at a 16° angle. It is the optimum angle for fine scraping and shaving with less gouging or chipping.

## Miscellaneous Putty Knives and Scrapers

Tang-driven putty knives feature high-quality carbon steel blades and comfortable wood handles.

Patcher is made of tempered steel and plated for corrosion resistance. Perfect for small areas.

#### **MISCELLANEOUS PUTTY KNIVES AND SCRAPERS**

### 100X<sup>®</sup> Paint Scrapers with Carbide Blades

How can a Carbide 100X® Blade be 10 times sharper than hardened steel? Simple. Warner uses a special grade of tungsten carbide on 100X® Paint Scrapers because it is extremely hard and durable. In fact, the softest grade of tungsten carbide composite starts where steel stops.

Carbide 100X® Blades are diamond-ground to produce an edge 10 times sharper than steel! These blades will scrape more paint faster and cleaner than any standard, hardened steel blade! That's the performance that has pushed 100X® paint scrapers to the top of the "most wanted" list in the Warner line. Softgrip handles include removable bit.

#### Affordable Scrapers and Blades

Good quality at an economical price. Ideal for light-duty, home projects and more. Rugged, comfortable-to-use scrapers have plastic PistolGrip™ handles that arch up for proper leverage. Blades are high-carbon steel, industrial-ground, easy to replace and can be re-sharpened as needed.

Choice of two or four scraping edges depending on blade type. Multiple scraping edges require less sharpening to help get more work done in less time.

#### **Specialty Scrapers**

Warner molding scrapers are designed for curved surfaces around windows and doors. High-carbon steel blades are industrial-ground for maximum sharpness.

Scraper #805 offers a 5" wide blade—the widest on the market—and a pivoting head so scraping edges can be rotated easily. Comes with two 2-edge blades, as does the #809.

## Strip 'N' Clean™ Scrapers for the Biggest, Toughest Jobs

Heavy-duty scrapers are made for professionals tackling big scraping jobs—from paint to floor tile. Great for removing adhesives, ceramic wall tile, asphalt tile, carpeting and various industrial applications. Featuring die-cast aluminum scraping heads for maximum blade rigidity and handles of steel or fiberglass with comfortable nonslip grips. The #798 head-only scraper can be used with any standard threaded pole.

#### 4" and 5" Scrapers

Industrial-ground carbon steel blades and big, beefy scrapers can take on practically any scraping job. Tools are designed to deliver maximum leverage on wall and floor surfaces. Multipurpose scrapers tackle anything from wax buildup to dried adhesives. Scraper #690 is a popular tool used in a wide variety of industries.

Scrapers are packaged with the blunt edge of the blade exposed for safety. Reverse the blade to expose the sharp edge.

#### 10-in-1 Folding Tool

It's another Warner innovation—performance that you carry in your pocket. This patented tool features a stainless steel blade in a secure lockback system. It has a reversible thumb knob for one-hand easy opening and a spring-loaded lock for closing.

Nylon handle resists chemicals and solvents and is textured for a nonslip grip. End cap is nickel-plated steel for setting nails or light hammering.

#### **Mini-Rollers**

Warner paint roller covers are made to fit virtually all mini-roller frames using a 6 mm rod and come with an easy-to-use plastic core that slides over the rod. Our roller fabrics are secured to the core using a special process and stand up to water and solvents without damage. Warner rollers produce great results quickly and easily with just about any type of paint or material.

#### **Making the Right Choice**

SURFACE/PROJECT	FABRIC
Metals, Cabinets, Trim	Smoothfoam™
Doors, Cabinets, Furniture	Veri-Smooth™
Walls, Closets, Siding	Profab™
Stains, Sidings, Waterproofing	Ultra-Sorb™
Walls, General Purpose	EZ-Roll™

#### SMOOTHFOAM™ – ULTRA-SMOOTH SURFACES

High-density foam mini-roller offering outstanding rollout results with a variety of coatings. The domed-end reduces bubbling and line marks caused by square-ended rollers, producing cleaner, clearer finishes. Use with varnishes, urethanes and low-viscosity enamels.

#### **Glass Cutter**

Proper tools make prepping windows for painting practically trouble-free. The glass cutter has a super-hard cutting wheel and breaking ball.

#### **GLASS CUTTER**

Item	Description	Type of	Pack	Pack
No.		Packaging	Weight	Qty.
138	Glass Cutter	Carded	1	10

#### **Window Tools**

The window opener helps to break windows free after they have been painted shut. The double-ended window tool helps remove old, hardened putty and apply new putty for a neat, clean seal. The 1-5/8" sharp chisel edge is the largest window blade on the market, making compound removal faster and easier. The glazing blade is angled to give you a perfect bead every time.

#### **WINDOW TOOLS**

142	Glazier Push Points	Carded	1	10
268	Window Opener	Carded	3	10
395	Double-Ended Window Tool	Carded	2	5

#### **Utility Knives**

Utility knives feature heavy-duty, die-cast zinc or aluminum housings with ground and honed high-carbon steel blades. Three styles are available. Side or top trigger release designs allow blade to be retracted for safety. The fixed-blade version securely clamps the blade in a cutting position. #350 side trigger knife has four locking blade adjustments and accepts all Warner utility blades.

Unique to the line is the ProCut® Rasp N' Knife,® which features a zinc body die cast to double as a drywall rasp. A special safety feature of the #566 safety utility knife is a spring-loaded, self-retracting blade. Pressing the trigger exposes the blade and the blade retracts when trigger is released.

#### **UTILITY KNIVES**

10072	12" Taping Knife, Blue Steel, "Pro Choice"	Labeled	3	5

#### **Corner and Curved Trowels**

Stainless steel blades are corrosion-proof and long-lasting. Adjustable trowel can handle a variety of wall-ceiling applications. Reversible handle on the adjustable trowels give you two tip angles.

The curved blade on a drywall trowel puts a perfect crown on finish joints.

Bull nose trowels (#148 and #149) are used to quickly knock down mud on outside bull nose corners.
