## WOOSTER

## ALPEA

## First in a New Generation of Professional Brushes

Alpha is made with a one-of-a-kind filament blend. It offers the smoothest flow (less drag) and carries more paint at the end of the brush, so it releases evenly to the surface-less effort while painting. In fact, Alpha paints up to $30 \%$ farther per dip compared to other brushes of equal size! Alpha features Micro Tip technology that delivers a finer finish than any other brush on the market today. It is designed with more fullness at the end, but still has Wooster's cut-in ability. Proven by contractors in the field and testing in the lab, Alpha is the leader in overall production efficiency.

## Wooster Alpha

- Unique synthetic blend featuring Micro Tip ${ }^{\text {TM }}$ filaments for the finest finish with all paints
- Stainless steel ferrule

- Firm, full formulation for smooth paint flow and increased production
- Sealed maple wood handle
