Designed to meet the tough standards demanded for professional window and door installations while effectively filling and sealing large cracks, gaps and voids. Unlike polyurethane foams, DAPtex® Plus will not overexpand, is toolable, moldable and cleans up easily with water. Remains soft and flexible when dry so it will not bow, buckle or distort frames. The innovative latex polymer foam technology provides water resistance and is paintable with latex paints once cured. Helps reduce energy loss as well as pest infiltration. Ideal for sealing air leaks to improve energy efficiency and reduce heating and cooling costs. Non-clogging, reusable applicator. Interior/exterior use.
